Helinks Web Demo Agenda

The Helinks STS Web Demo gives a short introduction to Helinks STS. The Demo will last 2 hours.

Topics:

- Introduction
- Birds eye view on the IEC 61850 Engineering process and Helinks STS.
- Demo of the tool
- Project Support an training provided by Helinks
- Wrap up

In the practical part (Demo of the tool) will start with an empty project and end up with a comprehensive SCD file including Report and GOOSE messages. It is possible to complete the engineering of the example system because we rely on predefined solution libraries.

Content of the Demo:

- System specification using Single Line and Function Editor (SSD, signal list, PDF document)
- IEC 61850 bay templates
- Working with ICD, IID and CID files
- System Integration
- Vertical communication (MMS Reporting, Station and Network Control Center communication)
- Horizontal communication (GOOSE applications)
- SCD File creation
- Documentation
